## ***Chapter 1 Moving from VB6* .....1**

|   |           |
|---|-----------|
| <i>What Is .NET?</i> .....                | <i>1</i>  |
| <i>Exploring Visual Studio .NET</i> ..... | <i>3</i>  |
| <i>Creating a Web Application</i> .....   | <i>9</i>  |
| <i>How Your Code Changes</i> .....        | <i>13</i> |
| Understanding the Framework .....         | <i>13</i> |
| Integer Upgrades .....                    | <i>14</i> |
| Strings .....                             | <i>14</i> |
| Variant and Currency .....                | <i>15</i> |
| Array Alterations .....                   | <i>15</i> |
| New Operators .....                       | <i>15</i> |
| Declaring Properties .....                | <i>16</i> |
| User-Defined Types .....                  | <i>17</i> |
| Change the Scope .....                    | <i>17</i> |
| ByVal Is Default .....                    | <i>17</i> |
| Set Has Disappeared .....                 | <i>18</i> |
| Error Handling Changes .....              | <i>18</i> |
| The Class Keyword .....                   | <i>19</i> |
| <i>Conclusion</i> .....                   | <i>20</i> |

## ***Chapter 2 Creating Great Windows Applications* .....21**

|  |           |
|--|-----------|
| <i>The Essentials</i> .....                      | <i>22</i> |
| <i>Developer Secrets</i> .....                   | <i>26</i> |
| Making Your Form Transparent .....               | <i>27</i> |
| Who Stole the ToolTips? .....                    | <i>27</i> |
| Tricks of the Trade: Resizing Made Easy! .....   | <i>28</i> |
| Five Steps to Split Panels, Explorer-Style ..... | <i>28</i> |
| Highlighting Errors with the ErrorProvider ..... | <i>29</i> |
| Learning the LinkLabel Control .....             | <i>30</i> |
| Customizing the MonthCalendar Control .....      | <i>31</i> |

|  |    |
|--|----|
| Creating Your Own Number-Only Text Box .....               | 32 |
| Displaying Animated GIFs Without the Browser Control ..... | 32 |
| The Two Methods of Changing Tab Order .....                | 33 |
| Secrets of Working with the System Tray .....              | 33 |
| Save User Time: Add Autocomplete to Combo Boxes .....      | 34 |
| The Power of Command-Line Parameters .....                 | 37 |
| How to Reset a Form .....                                  | 37 |
| How to Snap the Cursor to a Button .....                   | 39 |
| Capturing the Screen, Quick and Easy .....                 | 40 |
| Stunning Navigation Bars with a Little-Known Freebie ..... | 41 |
| Seven Steps to Taking Advantage of Windows XP Themes ..... | 42 |
| The .NET Way of Checking for Previous Instances .....      | 44 |
| Converting RTF to HTML .....                               | 45 |
| Drag and Drop from Windows Explorer .....                  | 48 |
| Dialog Boxes: What Did the User Click? .....               | 50 |
| Text Printing Class... That Works! .....                   | 51 |
| The Secret Rebirth of .PrintForm .....                     | 54 |
| The Facts on Visual Inheritance .....                      | 56 |
| Looking at Windows, Performance Counters, and More .....   | 57 |
| <i>Protecting Your Code with Obfuscation</i> .....         | 59 |
| Best of All Worlds: Creating an Ultra-Thin Client .....    | 60 |
| The Easy Way to Download Full Application Updates .....    | 62 |
| <br><b>Chapter 3 Web Sites in Seconds!</b> .....           | 63 |
| <i>The Essentials</i> .....                                | 64 |
| <i>Developer Secrets</i> .....                             | 69 |
| User Interface .....                                       | 69 |
| Code Techniques .....                                      | 69 |
| Optimization, Errors, and Other Tips .....                 | 70 |
| <i>User Interface</i> .....                                | 71 |
| Five-Step Checklist for the Validation Controls .....      | 71 |
| Displaying Web Warning Messages: Technique 1 .....         | 73 |
| Displaying Web Warning Messages: Technique 2 .....         | 75 |
| Unveiled: How to Create a Default Enter Button .....       | 77 |
| Wonders of the Little-Known SmartNavigation Property ..... | 78 |
| The Secret Behind User Controls .....                      | 78 |
| Why the Panel Control Is Super Useful .....                | 79 |
| Moving List Items Up and Down, Easily .....                | 81 |
| Resizing in Web Applications .....                         | 82 |
| Stopping Your User from Right-Clicking .....               | 82 |
| Creating Scrollable Micro Windows .....                    | 83 |
| Why You Should Learn CSS .....                             | 84 |

|   |         |
|---|---------|

| <i>Translating C# to VB .NET .....</i>                      | <i>336</i> |
| Translation Listing .....                                   | 337        |
| 1. Comments: // welcome to C# .....                         | 338        |
| 2. Remove the End-of-Line Semicolon; .....                  | 338        |
| 3. Data Types: int, bool, float, DateTime .....             | 339        |
| 4. Functions: public bool writeEventLog(string entry) ..... | 339        |
| 5. Methods: public void activateAlarm() .....               | 340        |
| 6. Variables: string strText; .....                         | 340        |
| 7. String Contents: \n and @ .....                          | 341        |
| 8. Objects: myObject = new myClass(); .....                 | 341        |
| 9. Scope: public, private, internal, static .....           | 342        |

|   |         |
|---|---------|
| 10. Arguments: ref and out keywords .....                                 | 342     |
| 11. Arithmetic: x++; .....  | 343     |
| 12. If-Then: if (x > y) { ... } else {...} .....                          | 343     |
| 13. Comparison: == and != and & and   .....                               | 344     |
| 14. Select Case: switch {x} {...} .....                                   | 344     |
| 15. Loops: for (x=1; x<=10; x+=1) {...} .....                             | 345     |
| 16. Errors: try {...} catch {...} finally {...} .....                     | 347     |
| 17. The Mystery of this .....   | 348     |
| 18. Events: obj.event += new class.delegate(handler); .....               | 348     |
| 20. Classes: Constructors and Finalizers .....                            | 350     |
| 21. Class Interfaces: myInterface myObject2 = (myInterface)myObject1; ... | 351     |
| 22. Class Inheritance Keywords: base, virtual, abstract, sealed .....     | 352     |
| <i>Cheating at the Conversion</i> .....                                   | 353     |
